Customer Problem Statement Template: Rising Waters – A Machine Learning Approach to Flood Prediction

Floods are among the most devastating natural disasters, causing loss of life, destruction of property, and disruption of livelihoods. Traditional flood prediction methods often rely on manual monitoring and delayed alerts, which limits the time available for communities and authorities to respond effectively.

EmpathyStatement:
The empathy statement for Rising Waters: A Machine Learning Approach To Flood Prediction is centered around the project's goal to provide timely and accurate flood risk predictions. By using machine learning, the project aims to reduce the number of people affected by floods and minimize the damage caused by them. The project's approach to using a Logistic Regression model and a simple Flask web interface highlights the importance of accessibility and user-friendliness in flood prediction systems.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers
